At 10:00 we had check out from room. We had a meeting with Ms. Anette Lilja, Rektor and Ms. Charlotta Thorbjornsson. We had communicated regarding certificate, our travelling and next visit to India in January 2020.

### Conclusion:

India and Sweden are geographically very diverse countries. There is lots of diversity in cultural, social & economical conditions which affect the disease pattern & treatment facilities. But with all the diversity we also experienced many similarities like enthusiasm to learn, welcoming nature, care & support towards students. That makes the exchange program was more successful.

We learnt lots about problems of youth and youth center, care of disable person & emergency care. We exchanged knowledge on vaccination food and national health program for children in both the countries.

It was great exchange of knowledge regarding nursing & medical subjects by different modalities like lectures, group discussion & visits of relevant places which makes the learning stress free & joyful. This exchange is about professional skills, especially in healthcare for children and youth, cultural exchanges, language development, and global understanding.

As it was also the cultural exchange, it added fun, friendship & sentiments to the success of the program. In brief the entire exchange program was very productive and informative for the students.

We are looking forward for the further exchange on these subjects in January 2020 when Teachers & students will visit India We will be very much thankful to **Tycho- Brahaskolan** for inviting us for this exchange program.

We are very thankful to **Atlas agency** for providing opportunity for this exchange program. We are looking forward to explore many more subjects under this exchange program in coming years.
